Portfolio: [mudaliarbala.github.io](https://github.com/mudaliarbala) · LinkedIn: [linkedin.com/in/mudaliarbalamurugan](https://www.linkedin.com/in/mudaliarbalamurugan)

Available Immediately · Full-Time · **On-Site in Waterloo, Ontario** · 12-Month Contract Welcome

PROFESSIONAL SUMMARY

Service-driven support specialist who has spent **3+ years as the first voice clients and colleagues reach** — combining a genuine **partner-first mindset** with the technical fluency to resolve issues rather than just forward them. Manages **high-volume inquiry inboxes and ticket queues to defined SLA response times**, onboards and provisions new users end to end, troubleshoots **login, credential, and access issues**, and follows every case through to completion with cross-functional teams. Communicates clearly in writing and in person with both technical and non-technical audiences, and has represented organisations directly to their customers and students in Canada. Comfortable holding **multiple concurrent deliverables** in a fast-changing environment, working to documented processes, and learning new platforms quickly. Post Graduate Certificate (Conestoga College) and Bachelor of Engineering; based in Waterloo, **local to the Waterloo office with no relocation or commute risk**.

CORE SKILLS

Partner & Client Experience: First-line support, partner-first communication, de-escalation, relationship building, brand representation

Onboarding & Provisioning: Account creation, persona setup, role-based access, provisioning & deprovisioning, environment setup, offboarding

Platforms & Tools: ServiceNow, Jira, Zendesk, Freshdesk, Active Directory, Azure AD / Entra ID, Intune — quick to learn new portals, CRMs and ERP systems

Process & Governance: Documented SOPs and best practices, knowledge base authoring, request templates, audit-ready record keeping

Credential & Access Troubleshooting: Password resets, MFA/2FA, account lockouts, expired credentials, permission errors, browser/session and web app issues

Inquiry & Inbox Management: Shared inbox ownership, SLA response times, prioritisation, triage, escalation, proactive status updates

Order & Request Coordination: End-to-end tracking to completion, cross-functional follow-up with billing, procurement and vendor teams, closure reporting

Microsoft 365 & Reporting: Outlook, Teams, SharePoint, OneDrive, Excel — trackers, status dashboards, monthly reporting

Communication: Written & verbal communication, technical walkthroughs for non-technical users, user training, documentation

Languages: English, Hindi, Gujarati, Tamil (fluent) · Punjabi (basic)

PROFESSIONAL EXPERIENCE

IT Support & Development Specialist — Client Support, Onboarding & Provisioning

April 2021 – March 2023

IT Path Solutions

- Served as the **first line of contact for 100+ users**, fielding **20+ inquiries per day** by email, phone, and portal — maintaining **95%+ SLA compliance** and a **90%+ satisfaction rating** through patient, plain-language guidance.
- Managed a **shared inquiry inbox and 30+ open request queue**, triaging by urgency and impact, responding within agreed SLA windows, and escalating to the right specialist team when needed.
- Handled **onboarding and provisioning end to end** — created user accounts and personas in Active Directory and Azure AD, assigned role-based access, set up working environments, and completed deprovisioning on exit with **zero security incidents**.
- Followed every request through to completion**, collaborating with **engineering, HR, procurement, and third-party vendors**, and keeping requestors updated at each stage rather than leaving cases open.
- Handled **login, credential, and access troubleshooting** as a core daily task — password resets, lockouts, MFA/2FA failures, and permission errors — maintaining **accurate case records, follow-ups, and documentation** throughout.
- Contributed to **governance standards** by writing and maintaining SOPs, request templates, and a shared knowledge base — making the team's process repeatable and auditable.
- Delivered **orientation and training walkthroughs** to new users on systems and applications, reducing repeat questions and improving self-service adoption.

Application Support & Development Intern

January 2018 – May 2019

Silverwing Technologies · Concurrent with Bachelor of Engineering

- Acted as the support contact between end-users and the development team — **triaged reported application issues**, logged defects with clear reproduction detail, and coordinated resolutions across teams, contributing to **2 stable production releases** delivered on schedule.
- Authored **user-facing guides and delivered technical walkthroughs** to non-technical stakeholders, supporting smooth adoption of new features and reducing repeat questions.

- Ran **structured manual and automated testing** (JUnit, Espresso) across both release cycles, catching defects before release and measurably reducing post-release support escalations.

KEY PROJECTS

Support Triage Workflow & Knowledge Base

2022

IT Path Solutions — Internal Process Improvement

- Built a **structured triage workflow** that reduced first-response time by standardising how requests were categorised, prioritised, and assigned to the right team.
- Created a **shared knowledge base covering the top 20 recurring issues** with step-by-step resolution guides, reducing escalations by an estimated **30%**.
- Standardised **incident and request templates** with 3 team members, improving SLA compliance tracking and documentation accuracy across the department.
- Designed a companion **asset and access tracker in Excel/SharePoint covering 100+ devices and user assignments**, with a standardised check-in/check-out process and monthly reporting to management.

ADDITIONAL EXPERIENCE

Customer Service & Operations Team Member

April 2025 – Present

Mediterraneo Greek Family Restaurant · Waterloo, ON

- Deliver **high-volume customer service** in a fast-paced, shift-based environment — handling **50+ customer interactions per shift** with professionalism and composure under pressure.
- Coordinate **multiple concurrent priorities** — order accuracy, timing, and team communication — demonstrating the multi-tasking and deadline management required in SLA-driven support work.

Orientation Volunteer — Student Onboarding & Support

May 2024

Conestoga College · Waterloo, ON

- Coordinated **onboarding for 200+ incoming students** in a high-volume, fast-changing environment — managing real-time process gaps and keeping a structured schedule on track.
- Triageed student questions and **routed each to the correct department**, applying active listening and service-routing skills directly transferable to first-line partner support.
- Maintained organised records and documentation with discretion, supporting accurate institutional reporting.

EDUCATION

Post Graduate Certificate — Mobile Solutions Development

May 2023 – August 2024

Conestoga College · Kitchener, Ontario

Bachelor of Engineering — Computer Engineering

May 2015 – August 2019
